Attachment to Advisory Action:

- 1. In claim 1, as presented in the amendment filed 31 October 2003, the phrase "wherein the conductive inlay film the conductive film is" in line 10 of the claim is unclear in meaning and thus raises a new 112 issue, which requires further consideration. Entry of the amendment is denied for this reason.
- 2. Regarding the 102 and 103 rejections using Zohni alone, applicant argues that there is no teaching in Zohni that relates a flexible dielectric layer to a specific embodiment taught in the figures of the reference. The examiner has cited Figure 2A of the reference in the office action. The written description of Figure 2A in the reference at column 5, lines 17-21 refers to element 112 being a "flexible dielectric layer". Applicant's argument is therefore not persuasive.
- 3. Regarding the 103 rejection using Chrai et al. applicant argues that the relatively flexible chuck of Chari et al. made of a film dielectric .254 mm in thickness is not the same as the instantly claimed flexible film. The examiner simply does not

see the difference in a chuck that is flexible because it is made of a thin film and a thin film that is flexible.

- 4. Regarding the amended form of claim 2 that is presented in the amendment filed 31 October 2003, the examiner constructs "A flexible conductive inlay film" in the preamble of the film such that it is given weight, as it modifies the structure recited in the body of the claim.
- 5. The period of response to the final office action remains running from the 29 July 2003 mailing date of that action.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 703-308-2420 (changes to 571-272-1503 as of Jan. 04). The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 703-308-4251. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0651.
